

Take Control of Deliveries • Increase Profits

Ecogreen Tank Monitor™ - For commercial tanks of all sizes

Reduce your delivery costs...

With a view of your customer's tank levels and usage history, you'll know when and where your trucks should be headed. You'll be able to maximize your efficiency, expand your territory and provide great service to your customers!

- Frequent updates – tank levels and location information update every two hours
- Simple to use – access tank data, usage history and days-to-empty
- Email and text-message alerts – notify personnel ahead of costly run-outs
- Solar powered – increases battery life
- Accessible – tank levels can be monitored via PC, tablet or smartphone
- Versatile – support for diesel, gasoline, lubricants, water/waste, agrichemicals and more

Manage your inventory...

You rely on your inventory, so make it easier to manage. View current levels and historical data to predict needs, place orders only when needed and prevent costly downtime!
