GLOBAL LEADER IN TANK MONITORING

DATAONLINE | WIKON | WESROC | iTank

Together, DataOnline, WESROC, Wikon, and iTank provide unmatched service and outcomes to more than 1,000 customers in over 60 countries across Europe, Asia, and the Americas. Berg Insight, in the August Global Remote Tank Monitoring Market, reports the combined businesses are 3x larger than the next biggest remote monitoring competitor. With expertise in multiple monitoring segments – industrial gas, LPG, LNG, CO2, oil & gas – we partner with customers to enable improvements in safety, efficiency, and service around the globe.

1,000+ Customers
in over 60 countries

300,000+
Devices monitored across
cryogenic, LPG, LNG, oil & gas, water, CO2

Broadest Technology Base
LPWAN, NB-IoT, cellular LTE & satellite

#1
In North American industrial gas
In North American propane
In Germany industrial gas & LPG

90 years
Combined telemetry experience

CAPABILITIES

TANK LEVELS
- Propane
- Fuel Oil
- Diesel
- Gasoline
- Diesel Exhaust Fluid (DEF)
- Water / Waste Water
- Anhydrous Ammonia
- Lube Oils
- Industrial Cryo

ON / OFF
- Generators
- Furnace Burner Lock-outs
- Power Outages

TEMPERATURES
- Swimming Pools
- Jacuzzis
- Refrigerators
- Deep Freezes
- Walk-in Coolers
- Fish Tanks
- Homes / Rooms
- Wine Cellars

OPEN / CLOSE
- Propane Cylinder Cages
- Gates / Doors
- Walk-in Coolers

SOFTWARE INTEGRATION WITH CARGAS API

WESROC integrates directly with the Cargas API allowing access to prepopulate information from Cargas so users do not have to re-enter the same information twice. Also, WESROC automatically links our devices to the proper Cargas tank so that the manual step of linking readings is eliminated.

INDUSTRY EXPERTISE

Our team has been successfully developing monitoring solutions for fuel and propane marketers since the 1980s. Having worked in the fuel and propane industry themselves, our sales and management teams bring decades of experience to the table. Along with our seasoned in-house engineers, we have developed multiple solutions in conjunction with our customers to ensure they have the tools they require to accomplish their efficiency goals and impact their bottom line.

UNLIMITED TECH SUPPORT

Our expert support team is here to help you with anything you need, from creating a text alert for a driver, generating a report on your portal, installing hardware, or just ordering a dial, our world-class team will happily assist.

COMMUNICATION OPTIONS

**CELLULAR**   **SATELLITE**   **LPWAN**

Relying on one method of telemetry can limit what, and especially where, tanks and assets can be monitored. WESROC offers multiple telemetry options to our customers. We understand that location, elevation, terrain, network coverage, and budget are important considerations in determining your company's monitoring needs.

CUSTOMER MOBILE APP
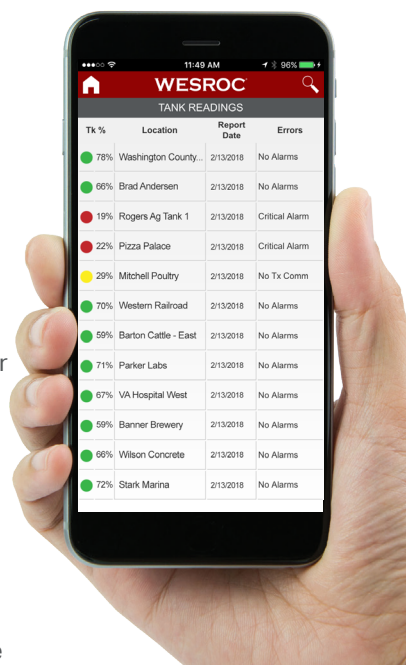

Build Trust and Improve Customer Engagement

- Improve service quality by eliminating run-outs and building customer trust.

- Open up avenues of communication to your customers through web and mobile app services.

- Proactively communicate with will-call customers about deliveries.

- Provide your customers with their tank data using the MyTankApp website and mobile app.

Download on the App Store | GET IT ON Google Play

OPERATIONS MOBILE APP

The WESROC operations mobile app is designed for the personnel in the field that interact with WESROC tank monitoring hardware and the WESROC customer portal. This easy-to-use app makes on-site hardware set-up easier and more accurate.

The app is also used by managers and sales/support staff to view up-to-date tank and asset status while away from the office. The WESROC mobile app enables all aspects of fuel/propane supply businesses to be more knowledgeable, flexible, and efficient while on the move.

HARDWARE

RTM
Residential Tank Monitor

- Field replaceable battery
- Low monthly reporting costs
- Magnetically mounted
- Operating temperature range of -40F to +140F

verizon√ AT&T

CTM (LTE)
Industrial Tank Monitor

- Communicates using LTE (Long-Term Evolution) cellular network
- Intelligent network/carrier back-up system
- Durable, fuel and chemical resistant case
- Long lasting, field-replaceable battery
- Easy to install, mounts magnetically

verizon√ AT&T

LTM
LPWAN Tank Monitor

- Cost effective large scale deployment – Extreme efficiency
- Enterprise web portal for easy back office integration – utilizing Microsoft Azure
- Easy installation with built-in activation verification

LoRa

STM
Satellite Tank Monitor

- Works everywhere, using Globalstar Simplex satellite network
- Easy installation, magnetically mounted, no indoor access needed
- GPS enabled for asset tracking
- Field replaceable battery

Globalstar
