

# DROP MORE GALLONS IN FEWER DELIVERIES WITH BI-DIRECTIONAL CARGAS ENERGY INTEGRATION!

## WE OFFER CARGAS CUSTOMERS A FREE BI-DIRECTIONAL INTEGRATION!

### THE INTEGRATION INCLUDES:

#### STANDARD FEATURES

- ▶ Tank level readings sent to Cargas Energy in real-time
- ▶ Integration set up in 24-48 hours

#### ADVANCED FEATURES

- ▶ Create delivery tickets directly in Cargas Energy from Tank Utility
- ▶ Sync data to Tank Utility from Cargas Energy to save time and data entry
- ▶ Tank Utility automatically syncs as your account data changes in Cargas Energy, no need to update in two places

## SAVE TIME WITH AUTOMATIC TICKET CREATION

Delivery tickets for monitored accounts can be automatically scheduled for you within Cargas Energy based on real-time tank level data and Tank Utility Estimated Fill Dates.

### PLAN AHEAD WITH PRECISION

Review scheduled delivery days and projected stops for monitored accounts ahead of time, rather than waiting until a tank has a low reading for ticket pulls.

### NEVER MISS A DELIVERY FOR MONITORED ACCOUNTS

The Tank Utility integration automatically triggers tickets to be created when tank level is low so you can rest assured your monitored accounts are covered.

### SIMPLIFY YOUR WORKFLOW

Eliminate the need to use two systems with tank monitors that fit seamlessly into the ticket pulls and dispatches you are already doing in Cargas Energy.

### ENSURE OPTIMAL DELIVERIES AND MORE EFFICIENT ROUTING

View the gallons needed for each tank on your delivery tickets with 100% accuracy.

“It’s crucial for us to have our tank monitoring data integrate with Cargas. While other tank monitoring vendors leave you to figure out how to program the API yourself, Tank Utility provides the software support to seamlessly bring your monitoring data into your back office.”

**DONNY GALT**, Co-Owner, Inter-Island Propane
