Exceptional support

Angus Energy has a 30-year track record for providing exceptional support to companies that deliver heating fuel. We understand how you run your business, how you make money, and the challenges you face. When you choose the GREMLIN[®], you get more than a terrific monitoring solution; you get a partner who is dedicated to and capable of helping you improve your business performance and profitability, with integrated best-in-class solutions such as ADEPT[™] performance tools and BRITE[®] Business Intelligence.

Data analytics: We provide in-depth reporting and insightful analysis of your delivery efficiency. Check out our BRITE[®] business intelligence software to get a taste for just how deep we can go.

Deployment analysis: We'll help you prioritize which tanks need monitors first, and calculate your return on investments.

Marketing and customer service training support: so you can roll out your GREMLIN[®] tank monitors for maximum impact.

Why tank monitors?

A nationwide study found that 65% of deliveries were either too small to make money or too big to feel safe that the customer won't run out. When you start using GREMLIN tank monitors, everything gets better

- Improve customer satisfaction
- Decrease trucks on the road
- Less stress on employees
- Increase your average delivery
- Better prioritization during cold snaps

Stop Guessing. Start Saving.
